### DataPlot-X Software

DataPlot-X software enables a PC to communicate with Dillon digital force gauges, torque gauges and displays via the instruments' standard RS-232 interface (300 to 19,200 baud). Data can be directly plotted/accumulated as force or torque vs. time, force as a function of calculated distance at 10 Hz data acquisition rate. Convenient setup and help files. RS-232 cable required (see below). IBM PC compatible (486 or better) running Microsoft Windows 3.1, 95, 98, 2000, NT or XP and available COM port.

Compatible with: AFG, BFG, FI-127, Wizard (with custom software), EDxtreme and Communicator.

<u>Part Number</u>		<u>Price</u>
60180-0014	DataPlot-X realtime graphing software on CD ROM . . . . .	\$ 185
49755-6019	DataPlot-X realtime graphing software on 3 1/2" floppy . . . . .	185

### Options

50477-0017	FI-127/Wizard to PC (9 pin) cable for use with DataPlot . . . . .	95
36057-0022	EDxtreme / Communicator to PC (9-pin) cable for use with DataPlot . . . .	95
46631-0026	Adapter, 25 pin COM to 9 pin cable assy (DB9M to DB25F) . . . . .	2
